

**Submission by Philip Munro-21 November 2024**

As a Pilot and hanger owner at an airport in NSW collective bargaining is the only way to go! I currently fly into Toowoomba for training purposes. I fly for an energy company that has a large project on the books in the Toowoomba region and hangerage and maintenance facilities will be required , probably at Toowoomba. At my own base airport I have seen the pains of each hanger owner having to go and try and negotiate a lease on their own. Regards Philip Munro
