

## **Submission by Sarina Kelly-25 August 2025**

- No supermarket payouts – Money should go to recycling & recovery, not supermarket subsidies. - Public funds, public benefit – The levy comes from what we all pay. It must deliver environmental outcomes, not private gain. - Fairness – Communities are already paying. Supermarkets shouldn't get special treatment. - Innovation required – Without it, this scheme just repeats old failures. - Fix governance – SPSA's board is dominated by the same companies creating the problem. Independent voices must have real power. - Stop the greenwash – Without changes, this looks like PR, not progress.
