Recitals

- A. On 11 March 2006, the Commission accepted Undertakings from Toll Holdings Limited ACN 006 592 089 ("Toll") under section 87B of the *Trade Practices Act 1974* (the "Act") ("Toll's Undertakings"). Toll's Undertakings were varied with the Commission's consent on 4 May 2006, 11 September 2006, 9 October 2006 and 13 December 2006.
- B. Toll's Undertakings were accepted by the Commission to address concerns held by the Commission in relation to the acquisition by Toll of Patrick Corporation (**Patrick**).
- C. Among the competition concerns identified by the Commission was that, by acquiring Patrick, Toll would acquire a 100% interest in Pacific National and that Toll would have the ability and incentive to cause Pacific National to favour Toll's freight forwarding operations on the East-West Corridor to the detriment of other freight forwarding customers of Pacific National on that corridor. The Commission also raised concerns that common ownership by Toll of both the Patrick and Toll automotive distribution businesses and vehicle pre-delivery and inspection services businesses would increase ownership concentration in the respective markets.
- D. Toll addressed the Commission's competition concerns in this respect by undertaking to:
 - a. divest a fifty per cent interest in Pacific National (referred to as the "PN Interest");
 - b. divest the rights and interests of Toll in PrixCar Services Limited (referred to as the "PrixCar Interest");
 - c. divest either Patrick's or Toll's vehicle transport and logistics business in Australia for domestically manufactured and imported vehicles (referred to as the "Vehicle Transport Business");
 - d. divest the operations conducted by Patrick Shipping Pty Limited (referred to as the "Patrick Bass Strait Shipping Business");
 - e. divest the assets used in Patrick's freight forwarding operation between Tasmania and mainland Australia (referred to as the "Patrick Tasmanian Freight Forwarding Business");
 - f. make available certain assets and rights to facilitate new entry and expansion on the East-West Corridor (referred to as the "East-West Rail Assets"); and
 - g. implement a non-discrimination regime and separation protocol which was subject to audit, as between Toll and Pacific National, and between Toll and Patrick's container terminals.

- E. On 13 December 2006, Toll announced its intention to implement a restructure of its group businesses by way of scheme of arrangement to create a new listed entity and trust to be known as "**Asciano**". The restructure is proposed by Toll to involve transferring the assets, entities and/or businesses listed in Schedule H-1 that comprise Toll's infrastructure assets to Asciano (the "**Proposed Restructure**").
- F. The Commission has been told by Toll that the Proposed Restructure will result in Toll ceasing to hold any interest in Pacific National, that Toll will have no ability to cause Pacific National to give preference to Toll's freight forwarding operations and Asciano will have no incentive to give or offer to Toll any such preference concerning the Toll operations. The Commission has also been told by Toll that the transfer of the Patrick Autocare business to Asciano will address concerns with respect to concentration in the markets for automotive distribution businesses and vehicle pre-delivery and inspection services.
- G. The Toll Director is of the view that the Proposed Restructure addresses the competition concerns held by the Commission as a result of Toll's acquisition of Patrick.
- H. The Commission is of the view that, having regard to its market enquiries in relation to the Proposed Restructure, the Proposed Restructure may have the effect of addressing the competition concerns it identified with respect to the acquisition of Patrick by Toll if the separation of Toll and Asciano results in two wholly independent entities. However, the Commission remains very concerned that the competition issues that arose by reason of Toll's acquisition of Patrick and which were addressed by Toll's original undertakings to the Commission continue to be addressed notwithstanding the Proposed Restructure. Additionally, the Commission is mindful that its competition concerns in the context of mergers are typically addressed by means of a transparent divestiture process. In the circumstances of the Proposed Restructure, these Undertakings, together with the Asciano Undertakings and the variation proposed by Toll to its undertakings, have the effect of replacing a transparent divestiture process with a complex transaction that is intended to result in the creation of Asciano which will own and control the assets that gave rise to the Commission's competition concerns.
- I. Notwithstanding the Commission's concerns relating to the Proposed Restructure, the Commission's market enquiries have revealed that the structural separation of the assets proposed to be owned by Asciano from Toll will, as compared to the enforcement of Toll's original undertakings, benefit competition. Consequently, the Commission has consented to the further variation of Toll's Undertakings and has accepted these Undertakings from the Toll Director. In accepting these Undertakings, the Commission has accepted assurances from the Toll Director that he or she will not act in a manner which is inconsistent with the intent of these Undertakings; namely, that Toll and Asciano will only ever have dealings with each other that are at arms length and on normal commercial terms. Additionally, the Commission accepts these Undertakings on the basis that Mr Mark Rowsthorn, the Asciano directors and Asciano offer undertakings, and in the case of Toll a variation to its undertakings, to ensure that Asciano and Toll are in effect wholly separate entities.
