Key messages

In March 2026, the ACCC increased its reporting of the fuel industry from quarterly to weekly reports in response to the conflict in the Middle East and flow on impacts to Australia.[1]

This is our twenty-ninth weekly report, with prices to 23 September.

The report provides the latest movements in crude oil, international refined fuel benchmarks, and domestic wholesale and retail fuel prices around Australia. A summary of other fuel-related ACCC actions is available on our website.

Between April and early September, the ACCC's weekly reports showed petrol and diesel price movements following fuel excise tax changes. The Australian Government temporarily cut the excise tax on petrol and diesel by 32 cents per litre (cpl) from 1 April to 30 June 2026. The Government partly restored the excise from 1 July to 2 August, and on 3 August, the Government fully restored fuel excise to 53.7 cpl. We consider that overall, fuel businesses appeared to pass on the excise changes in their prices in an appropriate manner.

Price movements over the last week

- Australian retail fuel prices are largely determined by movements in international refined fuel benchmark prices. Over the last week, average international refined petrol and diesel prices remained high as conflict continued in the Middle East.
- On 23 September, across the 5 largest cities (Sydney, Melbourne, Brisbane, Adelaide and Perth), daily average retail **petrol**[2] prices were 237.1 cpl, an increase of 12.9 cpl (or around 6%) from the previous week.
- Compared with 20 February, around a week before the conflict between the United States, Israel and Iran escalated, average retail petrol prices across the 5 largest cities were 66.2 cpl higher on 23 September.
- Compared with 31 March, when retail prices were around the highest following the escalation of the Middle Eastern conflict, average retail petrol prices across the 5 largest cities were 20.1 cpl lower on 23 September.
- On 23 September, daily average retail **diesel** prices across the 5 largest cities were 286.8 cpl, an increase of 18.9 cpl (or around 7%) from the previous week.
- Compared with 20 February, average retail diesel prices across the 5 largest cities were 110.2 cpl higher on 23 September. Compared with 31 March, average retail diesel prices across the 5 largest cities were 35.6 cpl lower on 23 September.
- Across more than 190 ACCC monitored regional locations, daily average retail prices (in aggregate) on 23 September for petrol were 242.7 cpl, and for diesel they were 288.9 cpl.

We encourage consumers to shop around by using fuel price apps and websites to compare retail prices at different retail sites before filling up.

[1] An amendment to the ACCC's fuel monitoring Ministerial Direction was published on 1 May 2026, directing the ACCC to continue preparing weekly monitoring reports until 30 September 2026.

[2] References to 'petrol' in this report are to regular unleaded petrol unless stated otherwise.

International refined petrol and diesel prices remained high as conflict continued in the Middle East

Australian retail fuel prices are largely determined by movements in international refined fuel benchmark prices (which are driven by international crude oil prices), and the AUD-USD exchange rate. International benchmark price movements drive domestic wholesale prices, which then influence retail fuel prices.

Additionally, in the 5 largest cities (Sydney, Melbourne, Brisbane, Adelaide and Perth), retail petrol prices have typically moved up and down in regular patterns, known as petrol price cycles. The ACCC petrol price cycles web page has more information on these price cycles: https://www.accc.gov.au/consumers/petrol-and-fuel/petrol-price-cycles-in-the-5-largest-cities. Retail diesel prices do not move in cycles.

On 20 February, average wholesale (terminal gate) petrol and diesel prices started edging up from the relatively stable levels that had been observed since the start of 2026.

On 28 February, conflict escalated between the United States, Israel and Iran.

International benchmark prices for refined petrol and diesel are the largest component of retail petrol and diesel prices.

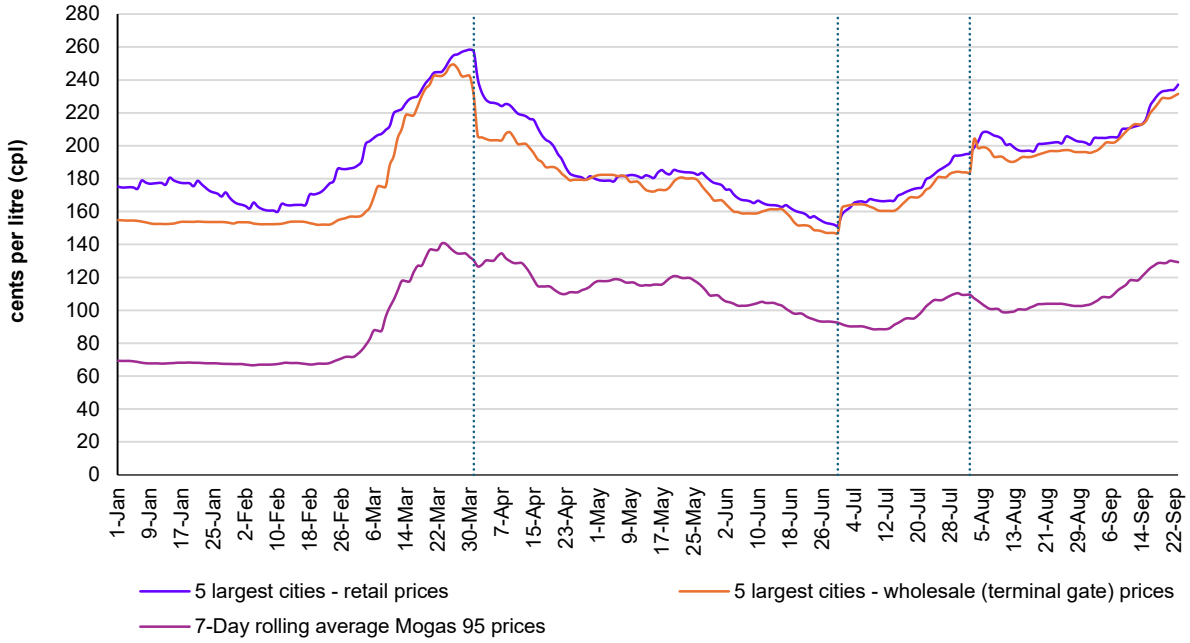
*The international benchmark for Australian retail **petrol** prices is Singapore Mogas 95 (**Mogas 95**). The international benchmark for Australian retail **diesel** prices is Singapore Gasoil with 10 parts per million sulphur content (**Gasoil 10 ppm**).*

Both petrol and diesel are refined from crude oil and their prices generally tend to follow similar movements over the long term. However, the different fuels have their own supply and demand characteristics (for example, compared with petrol, diesel also has remote energy generation and industrial uses) and the different refined fuels have their own international benchmark prices. It is these benchmarks that drive retail petrol and diesel prices.

The following charts show movements in daily average retail prices and daily average wholesale (terminal gate) prices in the 5 largest cities, against trends in weekly average international refined fuel benchmark prices between 1 January and 23 September 2026.

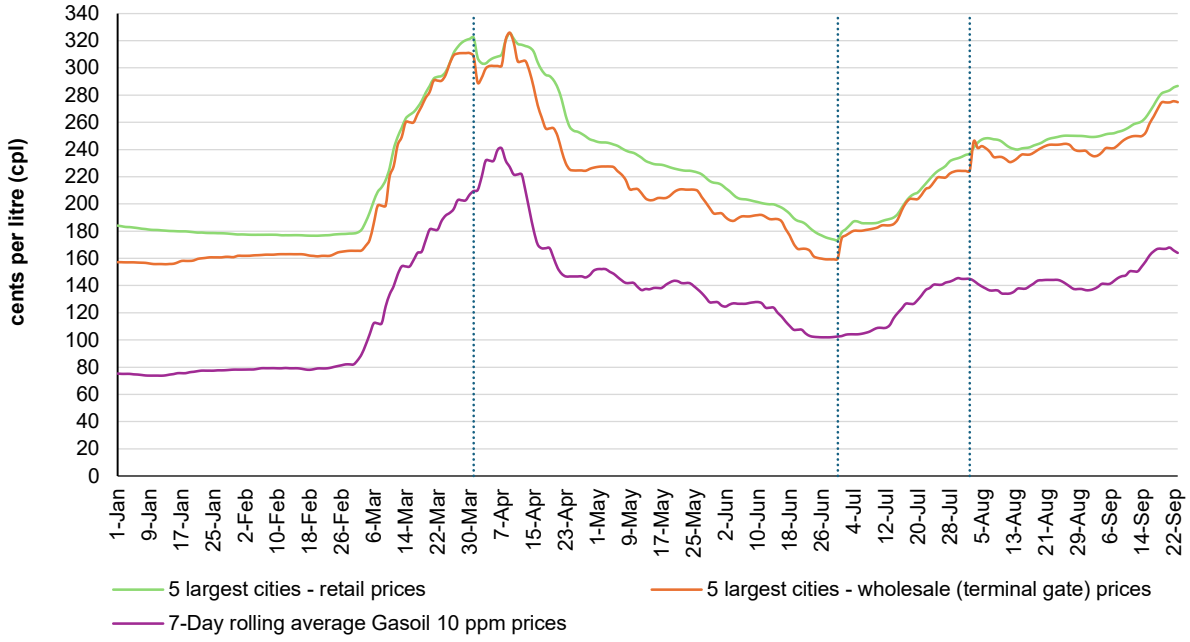
Figure 1 shows petrol price movements and figure 2 shows diesel price movements.

Figure 1 – Weekly average international refined petrol (Mogas 95) prices, daily average terminal gate prices for petrol and daily average retail petrol prices across the 5 largest cities



Sources: ACCC calculations based on data from Informed Sources, Argus Media, the Reserve Bank of Australia, and data published on the Australian Institute of Petroleum website.
Note: The dotted vertical lines in this chart represent the day before excise was reduced (31 March 2026), the day before excise was partially restored (30 June 2026) and the day before excise was fully restored (2 August 2026).

Figure 2 – Weekly average international refined diesel (Gasoil 10 ppm) prices, daily average terminal gate prices for diesel and daily average retail diesel prices across the 5 largest cities



Sources: ACCC calculations based on data from Informed Sources, Argus Media, the Reserve Bank of Australia, and data published on the Australian Institute of Petroleum website.
Note: The dotted vertical lines in this chart represent the day before excise was reduced (31 March 2026), the day before excise was partially restored (30 June 2026) and the day before excise was fully restored (2 August 2026).

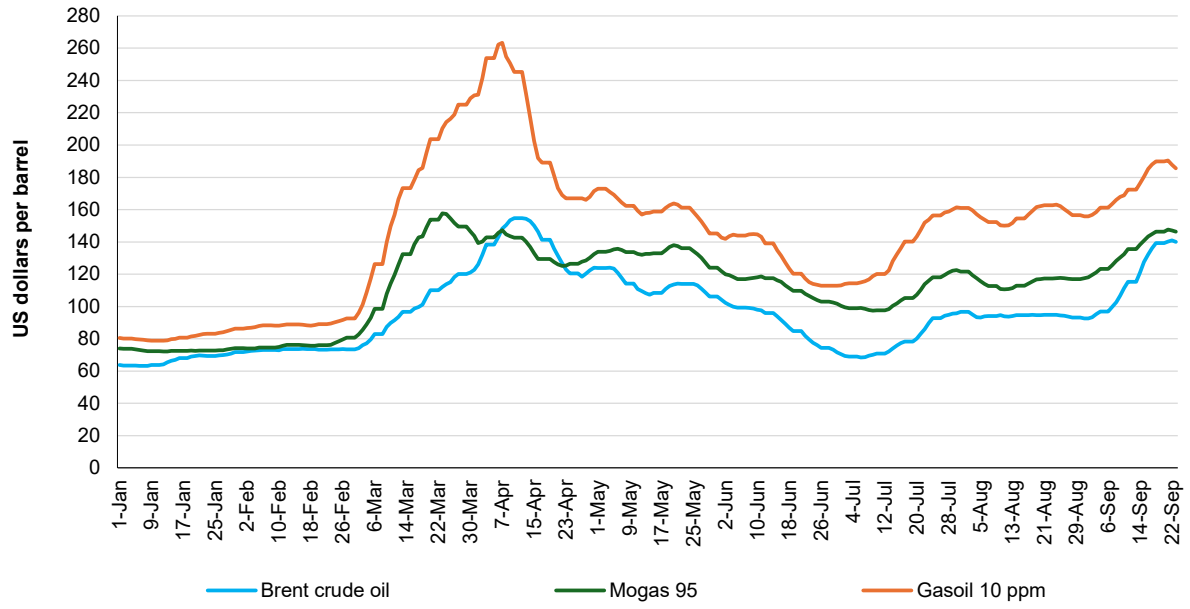
Figures 1 and 2 show that retail and indicative wholesale (terminal gate) prices for petrol and diesel have broadly reflected movements in their respective international refined fuel benchmark prices.

Retail petrol and diesel prices increased sharply in March, before easing from April to June, partly as a result of the fuel excise tax cut, as well as relatively lower international prices. International prices increased in July after attacks between the United States and Iran resumed.

Figure 3 below shows the movements of weekly average international dated Brent crude oil and refined fuel benchmark prices in US dollars between 1 January and 23 September 2026.[3] Day-to-day international price movements can be volatile and are continuing to respond to geopolitical developments.

In the week to 23 September, weekly average dated Brent crude oil prices, international refined petrol (Mogas 95) prices, and refined diesel (Gasoil 10 ppm) prices remained high as conflict continued in the Middle East.

Figure 3 – Weekly average international crude oil and refined fuel benchmark prices



Source: ACCC calculations based on data from Argus Media.
Note: Weekly average prices refer to an average of daily prices over the most recent 7 weekdays.

The following table shows weekly average dated Brent crude oil, and international refined petrol (Mogas 95) and refined diesel (Gasoil 10 ppm) benchmark prices for the weeks to 20 February, 31 March, 16 September and 23 September 2026.

[3] 'Dated Brent crude oil' refers to prices on the spot market for immediate or near-term delivery of crude oil.

Table 1 – Weekly average international crude oil and refined fuel benchmark prices

	Brent crude oil USD per barrel	Brent crude oil A cpl	Mogas 95 USD per barrel	Mogas 95 A cpl	Gasoil 10 ppm USD per barrel	Gasoil 10 ppm A cpl
Week to 20-Feb	73	65	76	68	89	79
Week to 31-Mar	123	111	144	130	231	209
Week to 16-Sep	132	116	143	126	185	162
Week to 23-Sep	140	124	146	129	186	164
Change 20-Feb to 23-Sep	67	59	70	61	97	85
Change 31-Mar to 23-Sep	17	13	2	-1	-45	-45
Change from the previous week	8	8	3	3	1	2

Source: ACCC calculations based on data from Argus Media and the Reserve Bank of Australia.
Notes: Weekly average prices refer to an average of daily prices over the most recent 7 weekdays.
'USD' means United States dollars.
'A cpl' means Australian cents per litre.

In the week to 23 September, weekly average Mogas 95 prices were around 129 cpl, an increase of 3 cpl (or around 2%) from the previous week.

In the week to 23 September, weekly average Gasoil 10 ppm prices were around 164 cpl, an increase of 2 cpl (or around 1%) from the previous week.

After the conflict began, international refined diesel prices increased more rapidly than refined petrol prices as the Middle East is a key supplier of both diesel and the crude oil grades that yield the greatest diesel volume upon refining.[4] The larger refineries in Asia, which Australia relies heavily upon for importing diesel, are mostly configured to process the more sour crudes produced in the Middle East. Since March, however, Asian refiners have sourced alternative supplies of crude oil from the United States, Russia, Africa and Latin America.[5]

Global crude oil inventories reduced further in August as renewed disruptions continued to affect tanker traffic out of the Middle East.[6]

Recent reports indicate ongoing policy discussions in the United States about a potential reduction in its diesel exports.[7] Whilst Australia does not import a large amount of diesel products from the United States, a reduction in diesel exports from the United States may have implications on global diesel markets, including prices in Australia.[8]

Refiner margins (the difference between the international price of refined products and the price of crude oil) are often cyclical and rose sharply at the outset of the conflict. Refiner margins reduced from those higher levels, but remain elevated for diesel. Refiner margins for petrol have recently reduced.

Indicative wholesale and average retail petrol prices increased in capital cities

Terminal gate prices *are prices that wholesalers charge for petrol and diesel in the spot market. The major wholesalers post these prices on their websites on a regular basis. Although few wholesale transactions occur at terminal gate prices and actual costs can vary across brands and cities, they are typically indicative of average wholesale prices. Terminal gate prices are indicative of the wholesale price of petrol or diesel only, and exclude transport and other retail operating costs.*

Note on terminal gate prices in the current environment

The ACCC has used terminal gate prices as a transparent and timely proxy for general movements in wholesale prices over time. The Australian Institute of Petroleum (AIP) issued a statement on 11 March about fuel supply in Australia, which noted that AIP members had been hit by a sudden rush of demand for fuel, and members had to prioritise supply to their regular customers and cease spot sales.[9] Given this, it is likely there have been fewer than normal transactions at or near terminal gate prices since the supply disruptions. The ACCC also heard from market participants that some transactions have been at quite different prices to published terminal gate prices.

The following tables show movements in daily average terminal gate and retail petrol prices in Australia's capital cities, from 20 February to 23 September 2026.

Table 2 – Daily average terminal gate prices for petrol – cents per litre

	Sydney	Melbourne	Brisbane	Adelaide	Perth	Canberra	Hobart	Darwin

Note: * The average price on Tuesday 22 September for Perth was 227.3 cpl before increasing as part of the weekly price cycle.

Across the 5 largest cities, daily average retail petrol prices on 23 September were 237.1 cpl, an increase of 12.9 cpl (or around 6%) from the previous week.

On 23 September, Canberra had the highest daily average retail prices among the 8 cities, and Adelaide had the lowest. From the previous week, Adelaide experienced the largest increase in average prices (16.1 cpl).

In Perth, some retailers increased regular unleaded petrol prices on Wednesday 23 September as they have typically done as part of the Perth weekly petrol price cycle.[10] Average retail petrol prices were 12.2 cpl lower on Tuesday 22 September (227.3 cpl) compared with Wednesday 23 September (239.5 cpl).

[10] While the average price increased, on Wednesday 23 September there were still 21 individual retail sites offering regular unleaded petrol below 222 cpl.
See: Western Australian Government, *Alert to Perth motorists - fill up now to beat the petrol price rise*, 22 September 2026, accessed on 24 September 2026.

Indicative wholesale and average retail diesel prices increased in capital cities

The following tables show movements in daily average terminal gate and retail diesel prices in Australia's capital cities, from 20 February to 23 September 2026.

Table 4 – Daily average terminal gate prices for regular diesel – cents per litre

	Sydney	Melbourne	Brisbane	Adelaide	Perth	Canberra	Hobart	Darwin
20-Feb	161.8	161.7	161.7	161.4	160.5	161.8	165.5	166.4

Change from the previous week	16.5	19.0	17.9	21.3	19.6	12.6	18.3	19.4

Source: ACCC calculations based on data from Informed Sources.

Across the 5 largest cities, daily average retail diesel prices on 23 September were 286.8 cpl, an increase of 18.9 cpl (or around 7%) from the previous week.

On 23 September, Canberra had the highest daily average retail diesel prices among the 8 cities, and Perth had the lowest. From the previous week, Adelaide experienced the largest increase in average prices (21.3 cpl).

Average retail petrol and diesel prices broadly tracked indicative wholesale and international price movements

The following figures illustrate movements in average international refined petrol (Mogas 95) and diesel (Gasoil 10 ppm) benchmark prices, daily terminal gate prices and retail prices for petrol and diesel in each capital city from 1 January to 23 September 2026.

For each city, the figures show average retail prices on each day (the purple lines for petrol, and green lines for diesel) and average terminal gate prices on the same day (the orange lines).

The figures also illustrate average terminal gate prices lagged by 7 days. Typically, there are lags between changes in wholesale prices and retail prices, because it is generally only when fuel stocks are replenished at a retail site that changes in wholesale prices flow through to retail prices. The ACCC has previously noted the lag in the larger cities is generally between 1 and 2 weeks.

The figures show trends in the difference between average terminal gate prices and average retail prices. The ACCC has generally considered this difference over time to be a broad indicator of average gross retail margins (including both retail operating costs and profits). Prices, costs and margins can vary significantly between retailers.

Average retail petrol and diesel prices increased across regional locations

The following tables show daily average retail petrol (table 6) and diesel (table 7) prices in the 8 capital cities and more than 190 regional locations across Australia.

Price movements can differ between regional locations, and comparisons between daily average prices in different locations should be treated with caution. The size of retail price movements in specific locations may be affected by a range of factors, including the stability of local fuel supply, local fuel shortages, the level of unexpected demand as well as the level of competition, the volumes sold, distance and locations factors, and the level of non-fuel sales.

The following tables include:

- daily average retail prices on 20 February, 31 March, 16 September and 23 September
- the change in prices from 20 February to 23 September
- the change from 31 March to 23 September, and
- the weekly change from 16 September to 23 September.

Regional petrol prices

Across all the regional locations monitored by the ACCC, daily average retail petrol prices (in aggregate) on 23 September were 242.7 cpl, an increase of 14.1 cpl (or around 6%) from the previous week.

Regional diesel prices

Daily average retail diesel prices across all monitored locations (in aggregate) on 23 September were 288.9 cpl, an increase of 18.0 cpl (or around 7%) from the previous week.

Table 6 – Daily average retail petrol prices – cents per litre

Source: ACCC calculations based on data from Informed Sources.
Notes: Daily average prices represent an average of price levels throughout the given day.
There were no retail diesel prices available for Koo Wee Rup (Victoria) on 20 February and 31 March or for Kyabram (Victoria) on 31 March.
* Daily average diesel prices for Sale, Victoria in this report differ to weekly reports prior to the 10 July report. Since the 10 July report, one retail site in Sale has been excluded from the averages because of inconsistencies in its reported prices.
